A GRATEFUL PEOPLE. On the 20th of August 1672, the city of its tall trees, spreading over its Gothic houses, with its canals like large mirrors, in which its steeples and its almost Eastern cupolas are reflected; the city of the Hague, the eapital of the Seven United Provinces, was swelling in all its arteries with a black and red stream of harried, panting, and restless citizens, who, with their knives in their girdles, muskets on their shoulders, or sticks in their hands, were pushing on to the Buitenhof, a terrible prison, the grated windows of which are still shown, where, on the charge of attempted murder, preferred against bim by the surgeon Tyckalaer, Cornelius De Witte, the brother of the Grand Pensionary of Holland was con-

him to their hearts' content, although it must be said, that they generally used French refugees for the month-piece of their spite. Their national pride held him up as the Mithridates of the republic. The brothers De Witte, therefore, had to strive against a double difficulty, -against the force of national antipathy, and, besides, against that feeling of weariness which is natural to all vanquished people, when they hope that a new chief will be able to save them from ruin and slame.

This new chief, quite ready to appear on the political stage, and to measure himself against Louis XIV., however giganic the fortunes of the Gran.l Monarch loomed in the future, was William, Prince of Orange, son of William Il., and grandson, by his mother Mary Stuart, of Charles I. of England. We have menioned him before as the person by whom the people expected to see the office of Stadtholder restored.

This young man was, in 1672, twentytwo years of age. John De Witte, who was his tutor, had brought him up with the view of making him a good eitizen. Loving his country better than he did his disciple, the master had, by the 'Perpetual Elict," extinguished the hope which the young Prince might have entertained of one day becoming Stadtholder. But God laughs at the presumption

of man, who wants to raise and prostrate the powers on earth without consulting the King above; and the fickleness and eaprice of the Dutch combined with the terror inspired by Louis XIV., in repealing the "Perpetual Edict," and re-establiehing the office os Stadtholder in favor of William of Orange, for whom the hand of Providence had traced out ulterior destinies on the hidden map of the future.

The Grand Pensionary bowed before the will of his fellow eitizens; Cornelius De Witte, however, was more obstinate, and notwithstanding all the threats of death from the Orangist rabble, who besieged him in his house at Dort, he stoutly refused to sign the act by which the otlice of Stadtholder was restored. Moved by the tears and entreaties of his wife, he at last complied, only adding to his signature the two letters V. C. (17 Coactus), notifying thereby, that he only vielded to force.

It was a real miracle that on that day he escaped from the doom intended for

John De Witte derived no advantage the Hague always so lively, so neat, and from his ready compliance with the wishso trim, that one might believe every day es of his fellow citizens. Only a few days to be Sanday; with its shady park, with after, an attempt was made to stab him in which he was severely although not mortally wounded.

This by no means suited the views of the Orange faction. The life of the two brothers being a constant obstacle to their plans, they changed their tactics, and tried to obtain by calumny what they had not been able to effect by the aid of the

How rarely does it happen that, in the right moment, a great man is found to head the execution of vast and noble designs, but it as rarely happens, that when the devil's work is to be done, the misereant is not at hand, who readily and at once enters upon the infamous task.

The wretched tool in this instance was Tyckclaer, a surgeon by profession. He lodged an information against Cornelius -who, as he had shown by the letters added to his signature, was faming at the repeal of the "Perpetual Edict"-had, from liatred against William of Orange, hired an assassin to deliver the new re-

He, too, received a noble recompense for his devotedness to the best interests of his country, taking with him into the retirement of private life, the hatred of a host of enemies, and the fresh scars of wounds inflicted by assassins, ony too often the sole guerdon obtained by onest people, who are guilty of having worked for their country, and of having forgotten their own private interests.

In the meanwhile, William, of Orange, arged on the course of events by every means in his power, eagerly waiting for the time when the people, by whom he was idolized, should have made of the bodies of the hrothers the two steps, over which he might ascend to the chair of Stadtholder.

Well, then, on the 20th of August, 1672, as we have already stated in the beginning of this chapter, the whole town was erowding towards the Buitenholf, to witness the departure of Cornelius De Witte from prison, as he was going to exile: and to see what traces the torture of the rack had left on the noble frame of the nan who knew his Horace so well.

Yet all this multitude was not erowdng to the Buitenholf with the innocent view of merely teasting their eyes with the spectacle: there were many who went there to play an active part in it, and to take upon themselves an office which they conceived had been badly filled-that of the executioner.

There were, indeed, others with less nostile intentions. All that they cared for was the spectacle, always so attractive to the mob, whose instinctive pride s flattered by it:-the sight of greatness inrled down into the dust.

"Has not," they would say, "this Cornelius De Witte been locked up, and broken by the rack? Shall we not see him pale, streaming with blood, covered with shame?" And was not this a sweet triumph for the hurghers of the Hague, whose envy even heat that of the common rabble; a triumidi, in which every honest

"Moreover," hinted the Orange agitators they hoped to manage like a sharpdged, and, at the same time, erushing nstrument,-"moreover, will not, trom the Buitenhof lo the gate of the towa, a nice little opportunity present itself to throw some handfuls of dirt, or a tew stones, at this Cornelius De Witte, who not only conferred the dignity of Sladt-I'i Coactus, but who also intended to have him assassinated?"

"Besides which," the fierce enemies of well and bravely at the Hague, Cornelius would certainly not be allowed to go into exile, where he will renew his intrigues with France, and live with his big sconndrel of a brother, John, on the gold of the

Marquis de Louvois." Being in such a temper, people generally will run rather than walk; which De Witte, setting forth, that the worden was the reason why the inhabitants of the

And every plarase of his speech, eagerly listened to by the populace, called forth enthusiastic cheers for the Prince of Orange, and groans and imprecations of blind fury against the brothers De

The mob even began to vent its rage by inveighing against the iniquitous judges, who had allowed such a detestable criminal as the villain Cornelius to get off so cheaply.

Some of the agitators whispered: "He ers replied:-

"A vessel is waiting for him at Schevening, a French eraft. Tyckelaer bas seen her."

"Honest Tyckelaer! Hurrah Eyekelaer!" the mob cried in a chorus. "And let us not forget," a voice exsame time with Cornelius, his brother him. Chucking her under the chin, he lied on his honor as a soldier. John, who is as rascally a traitor as himself, will likewise make his escape."

"And the two rogues will in France make merry with our money, with the money for our vessels, our arsenals, and

> CHAPTER II. THE TWO BROTUERS.

As the fair Rosa, with foreboding doubt, had foretold, so it happened. Whilst John D. Witte was climbing the narrow vinding stairs which led to the prison of his brother Cornelius, the burghers did their best to have the troop of Tilly, which was in their way, removed.

Seeing this disposition, King Mob, who fully appreciated the laudible intentions of his own beloved militia, shouted most

"Hurrah for the burghers!"

As to Count Tilly, who was prudent as e was firm, he began to parley with the burghers, under the protection of the ocked pistols of his dragoons, explaining to the valiant townsman, that his order from the States commanded him to guard the prison and its approaches with three

"The States, by George!". "The States are traitors." "I don't know anything about that."

"And you are a traitor yourself!"

"Yes, you." "Well, as to that, let us understand each other, gentlemen. Whom should I betray? The States? Why, I cannot hetrav them, whilst, being in their pay, I faithfully obey their orders.'

As the Count was so indisputably in the right, that it was impossible to argue against him, the mob answered only by redoubled elamor and horrible threats, to fect urbanity.

"Gentlemen," he said, "uncock your nuskets; one of them may go off by accident, and if the shot chanced to wound any of my men, we should knock over a couple of hundreds of yours, for which we should, indeed, be very sorry, but you even more so; especially as such a thing is neither contemplated by you, nor by myselt."

I have to do with no one but the States, by whom I am continued:paid; let me see an order from them to leave the place to you, and I shall only be too glad to wheel off in an instant, as I am confoundedly bored here."

"Yes, yes!" cried a hundred voices; the din of which was immediately swelled by five hundred others: "let us march to the Town-hall; let us go and see the depnties! Come along! come along!"

"That's it," Tilly muttered between his teeth, as he saw the most violent among the crowd turning away; "go and ask for a meanness in the Town-hall, and you my tine fellows, go!"

A TENDER PARTING SCENE. Epirar Henster-The econe on leaving the pier at New York was a very affecting one. I found it more difficult to keep one's eyes dry, than I had imagined, on seeing so many lears. There was quite a erowd assembled on the pier to witness the departure of the steamer. Fathers and mothers parting from their children, eisters and brothers parting from each other, young ladies separating from their lovers, and all parting from friends, possibly never to see each other again. Some would have alternate spells of convulsive erving and laughter, whilst others would solv continuously. There was one young lady in particular who attracted my attention. I suspected that she was parting with that "dearer one" that Hood speaks of in his "Bridge of Sighs." They stood on deck, close together, talking, seemingly, very confidentially, and their eyes beaming admiration for each other, when the bell tapped (that social top!). She threw her arms lovingly around his neck and cried, "O George!" He put his arm around her waist, and his only response was, "Mary, you are a honny lassie!"the parting kiss-the shake of the handand he was off.

DISCOVERS A PARAGON.

She was a young lady rather preposes sing in appearance, with a very bright and eparkling gray eye, and on entering into conversation with her, I found her to be possessed of more than ordinary research and intelligence. Born and reared near Glasgow, Scotland, evidently of good relatives in America, and was on her way home. It seemed to me that she had read and could tell me something of every book of note that has been written from the days of Josephus to the present time. 1 was surprised to find her extensive acquaintance with American as well as European poets; and from her favorite Burns she could quote line after line, and put into them that Scotch accent and feeling indulge to his stomach's content. that I never heard before.

HE ENDEAVORS TO "PUMP" HER.

I told her of the scene I had witnessed would be likely to go back to America eadl. "I am a believer in forcordination one to leave the ship

The RightWay to Kill Trees. The most of the nourishment of our trees is derived from the soil by means of the system of roots. There are plants which can exist solely in the air, deriving all their nourishment from the air by means of their leaves. In tropical regions this class of plants is very numerous, very many of the orchis family being of this habit. These plants have no roots proper, but what are regarded as roots are merely means of attachment to the bark of trees and stones and other objects. Still another closs of plants are true parasites; these have what answer to roots, which penetrate within the bark of other plants and draw their nourishment from the juices elaborated by the organs of those other plants. But these are divided into two classes: Those that have green foliage, by means of which the stolen sap is further elaborated and undergoes certain green and perhaps live wholly off' the sap sucked from the nurse-plans.

But in the case of by far the greater part of plants and nearly all of those not be sufficient, because the descend- will be increased, thus giving cheap familiar to us, the roots are necessary ing sap will, in some instances, be di- provisions. This is the ease with the coming season, and in addition to This is the principle on which we procoed when we root up noxious weeds. It will, therefore, always be safe to cut large quantities of pork, beef, lard, But in the case of trees this process of uprooting is impracticable. Can the roots of a tree be killed without lar, often a troublesome tree on acthus equalize the changes, which will go being uprooted?

Let us examine the process of the growth of plants and the nourishment of the roots. It is a fact that the roots of trees require constant nonrishment-they grow as tree grows. The come from the same organs as the growth and nourishment of the stem, viz.: from the leaves. If, then, you distance, -Cor. Indiana Farmer. prevent the nourishment of the roots von kill them. It can be demonstrated that the material of the growth of trees come from the leaves, descending, usually, between the bark and the wood. During the season of greatest organized into vegetable tissue, forms that mueilaginous coat by means of which the bark is readily separated from the wood. A portion of this new tissue forms a new layer or growth of wood, of which one is formed each growing season or year. Another portion goes to form a new layer of bark to keep the proper thickness of that substance.

If a wire be made tight around a limb or the trunk of a tree, as the tree increases in size it will be observed that it will bulge out more below than above the wires If any twig, which has leaves upon it, is cut off in the growing season, just below a leaf, if no sprout is allowed to grow, it will perish down to the next leaf. If a cut be made through the bark into the wood, if it heals up, it will be noticed that the new wood will form above and not below the cut. The circulation upward is in the pores of the wood; this is the crude sap going up the eaps-while the adjoining field was the time, three quarts cream. towards the leaves: this erude material is elaborated in the leaves and green parts of plants; and then, in a condidion to form vegetable vissue, de-

The Aldiue while Issued with all of the regularity, has nous of the temporary or timely in-terests characteristic of ordinary periodicals. It is an elegant miscellary of pure, light, and graceful literature, and a collection of pletures, the rarest collection of artistic skill, in black and white. Although each succeeding number affords a fresh pleasure to its friends, the real value and beauty of The Aldine will be most appreciated after it is bound up at the close of the year. While other publications may claim superior chespuess, as compared with rivals at a similar class, The Aldiuc is a nnique and

a similar class, The Aldiue is a nnique and original conception—alone and nnepproached—absolutely without competition in prica or character. The possessor of a complete volume cannot deplicate the quantity of fine paper and engravings in any ether shape or unumber of volumes, for len times its cost; and then, there is the chromo, besides!

The national feature of The Aldiue most be taken in no narrow sense. Trua art is cosmepolitsu. While The Aldiue is a strictly American institutioe, it does not confine itself to that perroduction of native art. Its mission is to cultivate a broad and appreciative art taste, one that will discriminate out grounds of Intriusic merit. Thus, while pleading before the patrons of The Aldiue, as a leading characteristic, the productions of the most noted American artists, attention will always be given to specimens from foreign masters, giving subceribers all that pleasure and instruction obtainable from home or foreign sonrees.

pleasure and instruction obtainable from home or foreign sonrees.

The erristic illustration of American securery, original with The Aldine is an important feature, and its magnificent plates are of a size more appropriate to the satisfactory treatment of details them eas be afforded by any interior page. The judicious interspersion of is ndecape, marine, figure and animal subjects, sustain an analysist interest. Impossible where the score enabated interest, impossible where the scope of the work confines the artist too closely to a single styla of subject. The literature of The Aldine is a light end graceful eccompaniment, worthy of the artistic features, with only such technical disquisitions as do not interfere with the popular interest of the work.
